

A SHORT PITCH

NEUROEDGE AI

On-Device Intelligence, Powered by Snapdragon®

Fast. Personalized. Private. Right on your device.

THE PROBLEM

Cloud-Dependent AI Can't Keep Up

Latency Kills the Experience

Round-tripping every request to the cloud adds delay users notice and dislike.

Privacy Risk

Sending personal data off-device increases exposure and erodes user trust.

Connectivity Dependence

Poor or absent internet access breaks the experience entirely, everyday.

THE SOLUTION

Intelligence That Lives On the Device

NeuroEdge AI is a real-time AI solution that delivers fast, personalized, and privacy-focused experiences directly on the device. By leveraging on-device AI capabilities powered by Snapdragon[®], it minimizes dependence on cloud processing — enabling low-latency responses, stronger privacy, and efficient performance.

From Input to Insight — All On-Device

1

Capture

The device senses input locally — voice, text, sensor, or usage data.

2

Process

Snapdragon®'s on-device AI engine runs inference instantly, with no cloud round-trip.

3

Deliver

A fast, personalized response is returned — privately, even without connectivity.

KEY FEATURES

Built for Speed, Privacy, and Reach

Real-Time Performance

Instant, on-device processing with minimal latency.

Privacy by Design

Sensitive data stays on the device, reducing cloud exposure.

Snapdragon®-Powered

Optimized to leverage on-device AI hardware acceleration.

Low Connectivity Dependence

Reliable performance even with limited or no internet.

THE IMPACT

Smarter, Faster, More Accessible Apps

Instant

Response Times

On-Device

Data Stays Private

Offline

Ready Experience

NeuroEdge AI shows how edge intelligence makes everyday applications smarter and faster — while cutting reliance on constant connectivity.

Smarter. Faster. More Accessible — Everywhere.

NeuroEdge AI — on-device intelligence powered by Snapdragon®.
